LANKA (PVT) LTD

ABOUT SISILI PROJECTS CONSORTIUM (PVT) LTD

Founded as Sriyani Industries in 1980, Sisili grew from a small-scale absorbent cotton gauze manufacturer to a leading healthcare company dealing in medical disposables, devices, pharmaceuticals and equipment. With a turnover of US\$ 23 million in the past financial year, Sisili focuses on both local manufacturing as well as authorized distributors from principals in several countries (such as India, China, Germany, Indonesia and Czech Republic).

Sisili, together in a joint venture partnership with Lalan Rubbers Pvt. Ltd., also initiated the supply of locally manufactured disposable medical examination and surgical sterile gloves in Sri Lanka. The sterilization process occurs at the Multi-purpose Gamma Irradiation Facility under the Ministry of Power and Energy – and both products have over 90% local value addition; and are ISO and CE certified.

We are also Sri Lanka's largest hazardous clinical waste management service provider – through a US\$ 5.2 million, state of the art incineration facility processing over 15,000kg/day. We cater to approximately 10 million people living in the Western, Central and Southern Provinces.

Formed in 2018, Sisili diversified into agriculture through an acquisition of an 18-acre tea estate in hilly Kotmale region in Central Province - with the aim of transforming the space focusing on regenerative tourism, agricultural products and services.

We have developed several partnerships with neighbouring communities and farming cooperations to introduce multi-crop farming – featuring vegetables such as carrots, beans, brinjals, sweet potatoes and cabbage.

One such partnership is with three ISO 9001 certified coir manufacturing facilities (with over 300 employees collectively) to produce high quality coir products for export markets globally. With a consistent ability to supply over 100 40ft' containers per month, our product range is diverse and is currently being supplied across fifty five (55) countries.

ABOUT **SISILI** AGRI'S COIR PRODUCT RANGE

Sisili Agro's partnerships with ground level communities ensure self-sufficiency throughout the entire supply chain – including the limiting factor – which is the coconut husk. Our factories are ISO 9001:2015 certified together with GMP and Environmental Protection Licenses (EPL) as well.

We are an OMRI certified company and a 'National Exports Award' (NEC) winner – which is a 360 evaluation recognising compliance towards ethical production and trading.

Some of our main markets are South America, Mexico, Europe (such as Netherlands, Italy, Germany, Spain, UK), South Africa, South Korea, Australia, New Zealand, China, Oman, Dubai, Saudi, Turkey and Russia.

Our product range is as follows:

- Coconut Fibre Bales (Mattress & mixed fibre)
- Machine Twisted Fibre (FMT)
- Fibre in different packaging forms
- Growth media range:
 - Coco peat bricks (varying weights) & bales (25kgs)
 - Range of growth media mixes and grow bags
 - Coco peat jumbo bags (250kgs)
 - Coco peat for animal bedding
- Coir geo-textiles
- Horticultural Products

OUR PRODUCT RANGE

COCO PEAT BLOCK

Specification: Sizes 30x30x14 cm or tailored to customer's need. (5kg expanding to over 70 Liters)

COCO DISK

Specification: Sizes from 20 mm upwards. With or without membrane

BRIQUETTES

Specification: Bricks (20 x 10 x 5cm). 650 g expand to over 9 liters. Highly compressed 8:1

WEED SUPPRESSORS

Available in various sizes, different shapes & different densities. Tailored to individual need

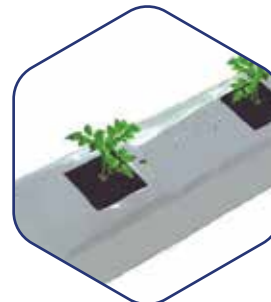

COCO POTS

Various sizes, different shapes & different densities. Tailored to individual need

COCO BALES

Specification: Low compressed bales in size 45x35x75 cm. 25 kg bales expand to over 180 Liters.

GROW BAGS

Specification: Long and short sizes as well as tailored sizes with customized mixes of growth media

GEOTEXTILE

Specification: 2m wide in rolls or in bales. Different grammages and eye sizes

ROLLS & WINTER MATS

Various sizes, different shapes and different densities. Tailored to individual need

BRISTLE FIBER

Bleached/Unbleached long fibers. With combing into different textures

TWINE

Bleached/Colored/Unbleached fibers. Twisted in different thickness for varying usage

COCO POLES

Extendable Or Non-Extendable creeper guide. With different diameters and different lengths

TAWASHI

Different diameters, bleaches, unbleached and/or with colors
